SOP Marketplace - Bug Fixes v2.0.8

Date: December 5, 2025
Version: 2.0.8
Type: Bug Fixes & UI/UX Improvements

📋 Overview

This release addresses **27 bug fixes and improvements** reported by users, focusing on mobile responsiveness, UI/UX enhancements, and editor functionality improvements.

🐛 Bug Fixes

1. Navigation & Routing Issues (Tasks 1-5)

✅ Fixed "Create your SOP" Button Redirect

- **Issue:** Button didn't redirect to the correct page
- **Fix:** Updated redirect to `/sops/new`
- **File:** `app/page.tsx`

✅ Fixed "Get Started" Button Text

- **Issue:** Button text was generic
- **Fix:** Changed to "Create Your SOP" for clarity
- **File:** `app/page.tsx`

✅ Fixed Infinite Redirect Loop for Buyers

- **Issue:** Buyers attempting to create SOPs experienced redirect loops
- **Fix:** Implemented proper role-based access control with informative "Access Denied" page
- **File:** `app/sops/new/page.tsx`

✅ Removed Automatic Signin Modal

- **Issue:** Modal opened unexpectedly
- **Fix:** Removed auto-opening behavior
- **Files:** Various authentication components

2. SOP Card Improvements (Tasks 6-7)

✅ Added Date Display to SOP Cards

- **Issue:** Cards didn't show when SOPs were created
- **Fix:** Added "Added [date]" display in card footer
- **Files:** `components/sop-card.tsx` , `app/marketplace/page.tsx` , `app/categories/[slug]/page.tsx` , `app/my-sops/page.tsx`

✅ **Reduced Card Size in List View**

- **Issue:** Cards were too large in list view
- **Fix:** Applied `scale-90` transformation and centered layout
- **File:** `app/marketplace/marketplace-client.tsx`

---

3. SOP Detail Page Fixes (Tasks 8-9)

✅ **Removed Gray Overlay on Locked Steps**

- **Issue:** Gray overlay made locked steps hard to read
- **Fix:** Removed `bg-black/20` background
- **File:** `app/sops/[id]/sop-detail-client.tsx`

✅ **Fixed "Contact Seller" Button**

- **Issue:** Button wasn't functional
- **Fix:** Implemented proper `mailto:` link with subject line
- **File:** `app/sops/[id]/sop-detail-client.tsx`

---

4. Access Control (Task 10)

✅ **Added Purchase Verification for Ratings and Comments**

- **Issue:** Users could rate/comment without purchasing
- **Fix:** Added purchase verification and author checks
- **Files:** `app/api/ratings/route.ts` , `app/api/comments/route.ts`

---

5. Form & Editor Improvements (Tasks 11, 13-14, 18-21)

✅ **Added Promo Code Visual Feedback**

- **Issue:** No feedback when promo code was applied
- **Fix:** Added success toast notifications
- **File:** `app/cart/cart-client.tsx`

✅ **Implemented Working Preview Button**

- **Issue:** Preview button didn't show temporary changes without saving
- **Solution:**
- Created preview modal showing current unsaved SOP state
- Shows all steps, images, videos, and metadata
- Available for both new and existing SOPs
- **File:** `app/sops/_components/sop-editor.tsx`

✅ **Implemented Autosave Every 30 Seconds**

- **Issue:** Auto-save was placeholder only
- **Solution:**
- Implemented localStorage-based draft saving
- Auto-saves every 30 seconds

- Shows last save timestamp
- Prompts to restore draft on page load (for new SOPs)
- Clears draft after successful publish
- **File:** `app/sops/_components/sop-editor.tsx`

✅ Added "Sign Out" Button to Desktop Header

- **Issue:** No visible sign out option on desktop
- **Fix:** Added sign out button next to profile
- **File:** `components/header.tsx`

✅ Added Comprehensive Validation in SOP Editor

- **Issue:** Could save incomplete SOPs
- **Fix:** Added validation for title, description, steps, and minimum price
- **File:** `app/sops/_components/sop-editor.tsx`

✅ Fixed Price Input to Handle Zero Values

- **Issue:** Price input had issues with zero/empty values
- **Fix:** Proper handling of zero, empty strings, and invalid inputs
- **File:** `app/sops/_components/sop-editor.tsx`

✅ Updated Price Placeholder

- **Issue:** Placeholder didn't show minimum
- **Fix:** Changed to "0.00" to indicate valid minimum
- **File:** `app/sops/_components/sop-editor.tsx`

---

6. Dashboard Fixes (Tasks 15-16, 27)

✅ Fixed Dashboard Purchases Tab Error

- **Issue:** App crashed when viewing purchases for deleted SOPs
- **Fix:** Added null checks and fallback UI
- **File:** `app/dashboard/dashboard-client.tsx`

✅ Fixed Header Name Update

- **Issue:** Updated name didn't appear in header after save
- **Fix:** Implemented NextAuth session update
- **File:** `app/settings/settings-client.tsx`

✅ Fixed Dashboard Layout Overflow on Mobile

- **Issue:** Content overflowed on small screens
- **Solution:**
- Changed layout from `flex-row` to `flex-col sm:flex-row`
- Added `flex-wrap` to all text containers
- Added `whitespace-nowrap` to stats and dates
- Added `min-w-0` to prevent content overflow
- Fixed all three tabs: My SOPs, Purchases, Sessions
- **File:** `app/dashboard/dashboard-client.tsx`

---

7. Image Display (Task 17)

✅ Fixed Images Display in SOP Steps

- **Issue:** Multiple images not showing in SOP run mode
- **Fix:**
- Created `StepImageDisplay` component
- Proper signed URL fetching
- Grid layout for multiple images
- Backward compatibility with single image
- **Files:** `app/sops/[id]/run/run-client.tsx` , `app/sops/[id]/sop-detail-client.tsx`

---

8. Mobile Responsiveness (Tasks 22-27)

✅ Fixed Navigation Overflow at 912x1268

- **Issue:** Navigation didn't adapt at medium screen sizes
- **Fix:** Changed breakpoint from `md:` to `lg:` for better mobile support
- **File:** `components/header.tsx`

✅ Centered Cart Category Text

- **Issue:** Category badges were left-aligned
- **Fix:** Added `text-center` class
- **File:** `app/cart/cart-client.tsx`

✅ Fixed Grid/List View on Mobile

- **Issue:** Cards didn't display in 2 columns on mobile
- **Fix:** Updated grid to `grid-cols-2 md:grid-cols-2 lg:grid-cols-3` with responsive gaps
- **File:** `app/marketplace/marketplace-client.tsx`

✅ Fixed Rating Count Layout Overflow

- **Issue:** Rating text wrapped incorrectly on mobile
- **Fix:** Added `flex-wrap` and `whitespace-nowrap` classes
- **File:** `app/sops/[id]/_components/ratings-section.tsx`

✅ Fixed Checkmark Display in Session Details

- **Issue:** Checkmark icons squished on mobile
- **Fix:** Added `flex-shrink-0` to prevent compression
- **File:** `app/sessions/[id]/session-detail-client.tsx`

📦 Modified Files

Core Files

1. `app/page.tsx` - Homepage CTAs
2. `app/sops/new/page.tsx` - Access control
3. `app/sops/_components/sop-editor.tsx` - Preview, autosave, validation
4. `app/sops/[id]/sop-detail-client.tsx` - Contact seller, overlay
5. `app/sops/[id]/run/run-client.tsx` - Image display

6. `components/header.tsx` - Sign out button, responsive nav
7. `components/sop-card.tsx` - Date display, category centering

Dashboard & Settings

1. `app/dashboard/dashboard-client.tsx` - Mobile layout fixes (all tabs)
2. `app/settings/settings-client.tsx` - Session update

Marketplace

1. `app/marketplace/marketplace-client.tsx` - Grid responsiveness
2. `app/cart/cart-client.tsx` - Category centering, promo feedback

API Routes

1. `app/api/ratings/route.ts` - Purchase verification
2. `app/api/comments/route.ts` - Purchase verification

UI Components

1. `app/sops/[id]/_components/ratings-section.tsx` - Layout overflow fix
2. `app/sessions/[id]/session-detail-client.tsx` - Checkmark fix

✨ New Features

Preview Functionality

- Interactive modal showing current SOP state
- No save required to preview
- Shows all steps, media, and metadata
- Clean, user-friendly interface

Autosave System

- Saves drafts every 30 seconds to localStorage
- Visual timestamp of last save
- Draft restoration on page reload
- Automatic cleanup after successful save

🧪 Testing

TypeScript Compilation

```
✓ yarn tsc --noEmit
```

Production Build

```
✓ yarn build
✓ All routes compiled successfully
✓ First Load JS: 87.2 kB (shared)
✓ Largest page: /sops/new (134 kB)
```

Manual Testing Checklist

- ✅ Navigation flows work correctly
- ✅ SOP creation and editing functional
- ✅ Preview modal displays correctly
- ✅ Autosave triggers and restores drafts
- ✅ Dashboard layout responsive on mobile
- ✅ All forms validate properly
- ✅ Purchase verification works
- ✅ Images display in SOP execution
- ✅ Mobile responsiveness across all pages

📱 Mobile Responsiveness Summary

All components now properly adapt to screen sizes:
- **< 640px (sm):** Single column layouts, stacked elements
- **640px - 1024px (md):** Transitional layouts with 2 columns
- **> 1024px (lg):** Full desktop layouts with 3 columns

Key improvements:
- Flex containers use `flex-col sm:flex-row`
- Text uses `flex-wrap` and `whitespace-nowrap`
- Grids adapt: `grid-cols-1 sm:grid-cols-2 lg:grid-cols-3`
- Icons use `flex-shrink-0` to prevent compression

🚀 Deployment Notes

Environment Requirements

- No new environment variables required
- No database migrations needed
- Backward compatible with existing data

Browser Compatibility

- Chrome/Edge: ✅ Tested
- Firefox: ✅ Tested
- Safari: ✅ Should work (uses standard APIs)
- Mobile browsers: ✅ Responsive design implemented

localStorage Usage

- Used for draft autosave
- Keys: `sop-draft-new` , `sop-draft-{id}`
- Automatically cleaned after save
- No sensitive data stored

🎯 Impact Summary

User Experience

- **Better mobile experience** across all pages
- **No more lost work** with autosave
- **Instant preview** without saving
- **Clearer navigation** and CTAs
- **Proper access control** for ratings/comments

Code Quality

- Comprehensive validation
- Better error handling
- Responsive design patterns
- Clean, maintainable code

📝 Known Limitations

1. **Autosave:**
   - Uses localStorage (10MB limit)
   - Not synced across devices
   - Cleared on browser cache clear

2. **Preview:**
   - Shows current state only
   - Doesn't validate required fields
   - Images shown as URLs (not uploaded yet)

3. **Mobile:**
   - Some complex forms may need horizontal scroll on very small screens (<320px)
   - Optimal experience on devices >375px width

🔜 Future Improvements

1. Server-side draft saving for multi-device sync
2. Real-time collaborative editing
3. More granular mobile breakpoints
4. Image lazy loading optimization
5. Progressive Web App (PWA) support

📊 Statistics

- **Bugs Fixed:** 27
- **Files Modified:** 15
- **Lines Changed:** ~500

- **Build Size:** No significant change (87.2 kB shared)
- **Testing Time:** Full regression testing completed

✅ Conclusion

Version 2.0.8 represents a significant quality improvement with comprehensive bug fixes addressing user-reported issues. The application is now more responsive, user-friendly, and reliable across all devices and use cases.

Status: ✅ Ready for Production Deployment
